Reclamation Bond : The surety was released at the request of the operator via an email request to Penny Berry on July 17, 2012. No MR-SITE was received by the Division.

Purpose of Inspection: Routine annual Inspection. This was the first documented site visit and inspection for the mine.

Inspection Summary: This site is/was adjacent to the Metz Hollow Pit, an SMO. On April 19, 2010 a LMO was submitted to the Division, which covered both SMO's. The LMO was approved on April 26, 2011. On March 8, 2012 the permit was transferred to Geneva Rock Products. Geneva is now solely responsible to conduct mining and reclamation as outlined in the LMO NOI. Photos were taken to document site conditions of the SMO.

Conclusions and Recommendations: The Division has no recommendations for the SMO, as of the time of writing this inspection, the SMO is retired and the disturbed ground is part of the LMO M/029/0008. No additional inspections will be made by the Division of this permit, but inspections will be made of LMO M/029/0008 when the Division is in the area.
